RE: Application for position Java Backend Developer

Respected Reviewer,

As a highly motivated and dedicated individual with strong communication and interpersonal skills, I would like to apply for position Java Backend Developer.

I have recently completed my B.Sc. degree in Computer Science and Engineering from Military Institute of Science and Technology.

Although I am a fresh graduate, I have working experience in different programming language as C++, Java while noticing your supported technology when going through your company website. In academy, I completed some major Java desktop applications and web development projects. You can manage to find the projects URL included in the "Project" section of my resume.

I am hard-working, disciplined and quite passionate about programming, practice problem solving in different online judges and also interested in learning new technology.

I would like to be a part of this reputed firm to utilize my engineering knowledge & expertise. This would be the right opportunity and I strongly believe that if given a chance I will prove myself and contribute to the growth & success of the organization.

Thank you for your time and attention
Jubair Hossain
